

SAAMEYNTA

SCALING-UP SOLUTIONS TO DISPLACEMENT IN SOMALIA

The Saameynta (Impact in Somali) Joint Programme aims to address the complex challenges of internal displacement in Somalia through innovative and sustainable solutions, supporting the Federal Government of Somalia in their goal to **achieve durable solutions for an estimated 3.8 million internally displaced persons (IDPs)** within the country.

The primary objective is to lay the foundations that empower cities to integrate IDPs into urban environments effectively, ensuring that they are placed on pathways to durable solutions. As an aspirational impact, Saameynta seeks to contribute to: “Promote the sustainable integration of displaced communities in urban areas by empowering governments to leverage value generated by urbanization and urban infrastructure investment and to increase displacement-affected communities’ (DACs) self-reliance and access to sustainable basic services in three Somali cities (Baidoa and Bosaso)”.

The more attainable programme goal of Saameynta is to scale up: “Investments toward mixed-use land development packages and urban public works which will generate land value increments that, combined with advancements in land tenure security and employment, will increase opportunities for self reliance and access to social services hence contribute to durable solutions at scale in a DAC-inclusive way.

KEY FIGURES AND IMPACT

Since inception, the Saameynta Joint Programme has supported more than **74,262** individuals through activities that strengthened Adequate Standard of Living, Access to Basic Services, Access to Livelihoods, Housing and Land Property, and Access to Documentation.

12,054

PEOPLE

benefited from the **WASH Infrastructure built** under the programme

9,349

HOUSEHOLDS

received land title deeds benefiting approx. 56,400 individuals. **9,400 households** in IDP settlements were mapped through the *Social Tenure Domain Model*

9,609

PEOPLE

benefited through the **Maternal and Child Health Center** in Gribble

2,200

INDIVIDUALS

reached through **protection and GBV awareness-raising sessions** in Bosaso, with a **community-based protection committee established** at the Gribble relocation site

1,396

PEOPLE

benefited from the **livelihood initiatives** (i.e., Cash for Work, equipment grants, credit facility, etc.)

853

PEOPLE

relocated to sustainable neighbourhoods with **632 people** engaged in *Community based planning*

ACHIEVEMENTS

COMMUNITY INFRASTRUCTURE

- Solar-powered borehole
- Micro-irrigation drip system
- 560m market perimeter wall
- Gully backfilling in Barwaaqo Phase III
- 13 climate-smart, gender-sensitive housing prototypes
- Solid waste management system including garbage trucks (Co-Funding Mechanism)
- 91 permanent two-room houses
- Maternal and Child Health (MCH) Center
- Football field
- 88 solar streetlights
- 3.5km Biyo Kulule Road upgrade
- 1,200 trees planted
- Flood protection infrastructure

POLICIES & STUDIES

- Urban Land Management Laws
- Social Cohesion Strategies
- City Strategy and City Extension Plans
- Community Action Plans (2022, 2024)
- Economic studies
- SOPs for land registration
- Land policy frameworks
- Land Dispute Tribunal Regulations (LDT Regulation)
- Establishment of Lands Department

SAAMEYNTA II

Saameynta Phase 2 will pivot from a proof-of-concept to large-scale delivery of durable solutions, building on the proven approaches and lessons of Phase 1 to fully integrate displacement-affected communities into the urban fabric of Baidoa and Bosaso. The programme will continue supporting the development of relocation sites, inscribing it into a broader strategy to upgrade areas hosting high concentration of IDPs, in line with city extension plans. This will be accomplished through inclusive, climate-smart urban planning, economic development, and improved services, all led by accountable government institutions.
